Publisher's Note

Indexes to Aquaculture

As regular users of the journal will know, an author index appears at the end of each volume, and cumulative author and subject indexes at the end of every 25th volume.

Beginning with the first volume of 1995, there will no longer be an author index in each volume, and cumulative author and subject indexes will appear at the end of the last volume of the announced publication schedule for each year. For 1995 this will be volume 138. As usual, the last issue of each volume *will* contain a complete contents list for the volume.

Those 1994 volumes which have been published since the last cumulative index, and for which no subject indexes have yet appeared (volumes 126-128), will be covered in the cumulative subject index for the 1995 volumes.
